DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. In claim 1 at line 21, "threshold" has been changed to --threshold,--.

The examiner notes that this amendment is made merely to insert a comma "," in a manner similar to claim 6 at line 22 and claim 17 at line 19.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 25, 2007 has been entered.

Claims 1, 4-8 and 10 are pending.

Specification

The objection to the disclosure has been withdrawn.

Claim Rejections - 35 USC § 112

The rejection of claims 1, 4-6, 8 and 10 under 35 U.S.C. 112, first paragraph has been withdrawn.

Claim Rejections - 35 USC § 102 and 103

The rejection of claims 1, 4-8 and 10 under 35 U.S.C. 102(e) or 35 U.S.C. 103(a) based on Ding et al. (U.S. Pat. 6,580,977 B2) has been withdrawn.

Allowable Subject Matter

Claims 1, 4-8 and 10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest the instant invention regarding a controller which interrupts the reduction of a target electric power based on a first or second threshold, the first and second thresholds being predetermined based on a voltage-current characteristic during the start-up of the fuel cell stack to a completion of the start-up. The closest prior art, that to Ding et al., teaches a threshold value P_1 for comparison to a measured power, however, this value P_1 is a theoretical maximum power level for the fuel cell and not a value which is predetermined during the start-up period of the fuel cell. See col. 5 lines 24-28 and col. 7 line 54 et seq.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
